THE CRC SMARTWASHER®

A SMARTER & SAFER SOLUTION

The CRC SmartWasher® is a manual parts washer that replaces traditional solvent or aqueous alternatives. Its non-hazardous, non-flammable, water-based degreasing solution offers superior cleaning performance that's just as powerful as solvent-based solution, and it's safer for the user.

The CRC SmartWasher® meets the parts cleaning needs of modern businesses, while eliminating the hassle and cost of solvent waste disposal. The natural process of bioremediation breaks down and converts oil, grease and carbon-based contaminants into harmless by-products of CO₂ and water.

The bioremediation process reduces liquid hazardous waste streams and reduces the release of harmful pollutants into the environment.

FL-4 OZZYMAT® MULTI-LAYER FLUID ACTIVATION MAT

Designed for applications with normal to heavy usage, the FL-4 Multi-Layer OzzyMat® has (4) white layers and (1) blue layer. The white layers on the mat trap any particulate larger than 50 microns and should be peeled away once per week for optimum performance. The blue layer is the support structure that contains the microbes (Ozzy®) and delivers them into the system. These microbes (Ozzy®) migrate from the OzzyMat® into the OzzyJuice®, located in the SmartWasher® tank, and break down oil and grease.
