

## Mass Air Flow Sensor Cleaner

The **ORIGINAL** Mass Air Flow Sensor Cleaner

A dirty Mass Air Flow (MAF) sensor may cause difficult starting, poor acceleration, pinging, rough idle, excess emissions, wasted fuel and power loss. CRC developed Mass Air Flow Sensor Cleaner specifically to clean all of the soils found on the sensors including dust, pollen, soot and air filter oil that can burn onto the hot wires causing faulty read-outs and decreased engine performance.

- Unique precision cleaner specifically developed for cleaning the sensitive components of mass air flow sensors
- Plastic safe formula backed by proven test data to safely and easily clean MAF sensors without damaging sensitive components
- Include MAF sensor cleaning as part of every air filter service

- ▲ PLASTIC SAFE
- ▲ Increases Horsepower
- ▲ Leaves No Residue
- ▲ Reduces Rough Idle

- ▲ Improves Fuel Economy
- ▲ Decreases Hesitation & Pinging
- ▲ Proven Dynamometer Results!

Do not use on vehicles with a Karman Vortex air flow sensor (e.g. Toyota Supra Turbos, Mitsubishi and most Lexus vehicles)

**Brake, carburetor or air intake cleaners can damage sensitive MAF components.**

Stop using aggressive chemicals like brake, carburetor and air intake cleaners to clean dirty mass air flow sensors! These aggressive cleaners can do serious and expensive damage to sensitive MAF components, especially plastic. CRC Mass Air Flow Sensor Cleaner is the only product backed by proven test data to safely and easily clean MAF sensors without damaging the wires or plastic housing.
